**CSE 450 - Mobile App Development**
**Assignment 03**

Create calculator screens like shown in the screenshots/gif.

Few points to consider:
- Use provider to implement logics.
- **You can't use setState & Futurebuilder use in code** 😭.
- Implement Dark & Light mode theme.Dark theme looks like this reference screenshot but you can use any light colour theme for light mode.
- Break your UI into Widget (Create a button widget and use it).

**Bonus: <u>Animation and splash effect on button tap</u>.**

**Note : *Submit on LMS***

# Deadline - 22nd March 2023
